

Ref: Omron Environmental Policy, WEEE & RoHS Directives

Date: November 9, 2018

Dear customer,

Responding to your inquiry, please find below an overview of our environmental policy and actions, which we hope will give you a more accurate picture.

The Omron Environmental Policy

Omron is a global corporation that is committed to protecting the environment and has always had an active environmental policy. In July 2018, Omron established a mid- to long-term corporate environmental action plan "Carbon Zero environmental target" with the ultimate goal of achieving zero Scope 1 and Scope 2¹ greenhouse gas emissions by 2050:

- 2050 Aim at zero emissions
- 2030 32% reduction (compared to 2016 levels)
- 2020 4% reduction (compared to 2016 levels)

Promoting our efforts to achieve these targets will contribute to the Sustainable Development Goals (SDGs) set by the United Nations. In addition, Omron has more than 40 Manufacturing Sites throughout the world. It is standard Omron policy that a manufacturing site is approved to the latest ISO14001 Environmental Standards. All new manufacturing sites are targeted to achieve ISO14001 approval within three years after their start. Please visit our website for the full collection of our ISO14001 certificates:

RoHS – Restriction of Hazardous Substances.

Keeping in line with our environmental policy, Omron has committed to comply with the RoHS Directive. Omron assures adequate level of compliance to RoHS Directive for our product portfolio. Since 2003 we pioneered lead-free soldering and we adopted voluntary compliance from 1st April 2006.

Please visit our website for product specific information:

or contact your Omron local representative.

WEEE – Waste from Electrical and Electronic Equipment

On a global basis Omron is actively engaged in meeting the requirements of this directive. In Europe, Omron is cooperating at individual country level to establish procedures with organizations providing the infrastructure for the collection, recycling and disposal of waste from electrical and electronic equipment.

In addition Omron is committed to go beyond the RoHS and WEEE requirements. We are working through our own list of substances to remove, wherever possible, other substances that might be considered hazardous to the environment.

For the latest information about Omron and the environment please visit the following website:

In case you have any questions feel free to contact your Omron representative.

With best regards,

OMRON Europe B.V.

J.J.P.W. Vogelaar

European Quality and Environment Manager

¹ Scope 1: Direct greenhouse gas emissions resulting from the use of fuels at our company.

Scope 2: Indirect greenhouse gas emissions resulting from the use of electricity and heat purchased by our company.

Scope 3: Greenhouse gas emissions from our company's value chain. Consideration on Scope 3 emissions reduction will also begin in the near future
